

# Space 4 Critical Infrastructure

*Putting the EC proposal into action*

**24 May 2022 | 10:00–11:00 AM CEST**

This third session of Space 4 Critical Infrastructure invites the European Commission to share opportunities and views for the green and digital transition in the construction sector. Two examples will then be given of cooperative projects in the sector of infrastructure. One national project related to the use of satellite technology for monitoring the stability and security of infrastructure, and one European project on innovative EGNSS applications for roads and railways.

## Agenda

- Welcome and introduction by organisers
- The green transition in the construction sector, Philippe Moseley, European Commission
- Satellite technology for monitoring the stability and security of infrastructure, Raffaele Santangelo, 1000 infrastrutture
- EGNSS applications transforming roads and railways into a synergic ecosystem sharing digital infrastructures, safety and certification processes to lower energy consumption and pollution, HELMET project
- Q&A and closing remarks
