

# Space 4 Critical Infrastructure

## Public Administration

23 June 2022 |

Large-scale risks such as accidents, natural disasters, and antagonistic threats, may disrupt the provision of essential services and undermine confidence in critical entities, as well as in the authorities responsible for their oversight and for keeping the population safe and secure. During this 4rth webinar, several examples will be presented on how space can boost the preparedness of public administrations in this regard.
